

The HEINZMANN Group: Experts in Marine Technology

HEINZMANN is joining forces with its subsidiaries Data Process and REGULATEURS EUROPA at the KORMARINE (Booth 057) and MARINTEC (Booth 4C41-2) fairs where the latest marine-specific developments for engine and turbine management will be exhibited within the German Presentations.

Data Process

Data Process joined the HEINZMANN Group in February 2011. The products of Data Process are a perfect complement to the existing range of the HEINZMANN Group. In Oslo, Data Process will be exhibiting its alarm, monitoring and control systems for marine applications as well as complete maritime solutions:

- ReMACS – Remote Monitoring of Alarm & Control System for vessels at harbour
- SeaMACS – Marine Automation System

Data Process has already acted as HEINZMANN's Norwegian representative for many years, supplying this market with electronic speed governors as well as systems for power management and remote control of propulsion.

ReMACS – Remote Monitoring of Alarm & Control System for vessels at harbour

REGULATEURS EUROPA

HEINZMANN's subsidiary REGULATEURS EUROPA will be displaying further developments for its electro-hydraulic actuators and diesel engine governors:

- Hydraulic actuator 2800
- 1115 hydraulic governor with electronic speed setting
- 2231 hydraulic actuator with mechanical back-up

Since late 2005 REGULATEURS EUROPA (RE) has been a member of the HEINZMANN Group, adding its well established range of hydraulic governors and actuators. They are complimented by digital electronic controllers.

RE's strength lies in its ability to provide comprehensive and cost effective governing, control and monitoring packages, with a full range of after sales support for applications ranging across the marine, industrial and rail traction markets.

Heinzmann GmbH & Co. KG

Heinzmann GmbH & Co. KG is also presenting the following products at its stand alongside its tried and tested control systems for marine applications:

- ➔ ODYSSEUS – the complete Common Rail Fuel Injection System
- ➔ TRITON I: Oil Mist Detection System
- ➔ THESEUS: Digital Generator Management System

This extensive product portfolio allows HEINZMANN to further develop its position as one of the world's leading system providers for the management of diesel, gas and dual fuel engines and turbines and to expand the activities as vendor of complete systems for the shipbuilding market.

**ODYSSEUS – the complete
Common Rail Fuel Injection System**

HEINZMANN (www.heinzmann.com)

The HEINZMANN Group is one of the leading system suppliers worldwide for engine and turbine management solutions, specialising in all relevant technologies.

- ➔ Complete common rail systems
- ➔ Electronic fuel injection systems
- ➔ Mechanical and electronic speed governing systems
- ➔ Air fuel ratio controllers for gas fuelled engines
- ➔ Dual fuel system solutions
- ➔ Generator management
- ➔ Digital and analogue controls
- ➔ Mechanical and hydraulic actuators

The product portfolio is completed by engine emission management, safety systems for combustion engines, communication software and a variety of accessories. Our system solutions optimise the management of diesel, gas and dual fuel engines and gas, steam and hydro turbines.
